This calibration certificate documents the traceability to NMI (Australia), PTB (Germany), NIST (USA) or METAS (Switzerland), which realize the units of measurement according to the International System of Units (SI).
The expanded measurement uncertainty corresponds to the measurement results from the standard measurement uncertainty multiplied by the coverage factor k = 2. The true value is located in the corresponding interval with a probability of 95%.
Principles and methods of calibration comply with the technical requirements of ISO/IEC 17025.
NATA is a signatory to the multinational agreements of the International Laboratory Accreditation Cooperation (ILAC) for the mutual recognition of calibration certificates.
This calibration certificate may not be reproduced other than in full. Calibration certificates without signatures are not valid.
The user is obliged to have the object recalibrated at appropriate intervals.
